

Proud to have 24/7 Microbial Protection

This facility is being protected by equipment from
Extreme Microbial Technologies.

Ionized Hydrogen Peroxide with High Energy Clusters is **chemical free** and **safe** for people, products, plants and pets and has been scientifically tested to reduce harmful pathogens such as bacteria, viruses, molds and mildews up to 99%.

Ionized Hydrogen Peroxide with High Energy Clusters reacts with and deactivates microbial contaminants on contact.

This Ionized hydrogen Peroxide is created within a specially designed cell utilizing specific wavelengths of light reacting with a coated catalyst cell which changes the existing water vapor in the air into Ionized Hydrogen Peroxide and High Energy Clusters. Safe and effective, and simply reverts back into oxygen and water vapor leaving behind no residue or odor.
